

SOS27 Workshop

Speaker first name, last name, and affiliation:

Miguel Gila, Swiss National Supercomputing Centre

Presentation title: “Service Management and the vCluster Technology”

Biography (max 700 characters, space included):

Mr. Miguel Gila has been working at the Swiss National Supercomputing Centre since 2011. With almost two decades of experience in scientific computing, he is currently the leader of a team that develops and operates the centre’s main computing clusters.

Mr. Gila is deeply committed to DevOps practices and software engineering principles, and his primary interests lie at the intersection of automation and service management, where he seeks to optimize system performance and streamline workflows.
