

SOS27 Workshop

Speaker first name, last name, and affiliation:

Andrew Jones, Microsoft

Presentation title: “Observations from Planning and Operating Very Large Scale AI Infrastructure”

Biography (max 700 characters, space included):

Andrew Jones leads the Future Capabilities for Supercomputing and AI within Microsoft Azure Engineering. He joined Microsoft in early 2020, following nearly 25 years of experience with scientific computing and supercomputing. He was initially a computational science researcher using HPC, later focusing on HPC technology research and performance evaluation, and then a HPC service architect and manager, and finally an impartial consultant with specialism in HPC technology evaluation, metrics, and cost/risk/value models.
