

SOS27 Workshop

Speaker first name, last name, and affiliation:

Lebrun-Grandié, Oak Ridge National Laboratory

Presentation title: “Sustainable HPC Software: Lessons from the Trenches (A Maintainer's Perspective)”

Biography (max 700 characters, space included):

Dr. Damien Lebrun-Grandié’s work at Oak Ridge National Laboratory, co-leading the Kokkos performance portability project, directly accelerates scientific discovery by enabling applications to run efficiently on diverse architectures. His leadership within the ISO C++ Standards Committee and the High Performance Software Foundation's Governing Board ensures that the foundational tools of high-performance computing evolve to meet the growing demands of scientific research.
