

SOS27 Workshop

Speaker first name, last name, and affiliation:

John Gounley, Oak Ridge National Laboratory

Presentation title: “Democratizing AI for Cancer with Privacy Preserving Synthetic Data Generation for Cancer Case Identification”

Biography (max 700 characters, space included):

John Gounley is a computational scientist in the Computational Sciences and Engineering Division at Oak Ridge National Laboratory, where he leads the Scalable Biomedical Modeling group. John’s research focuses on scalability of algorithms for biomedical simulations and data for the National Cancer Institute and Department of Energy.
