SOS27 Workshop

Speaker first name, last name, and affiliation:
Sergio Maffioletti, Scientific IT Services, Central IT, ETH Zurich

Presentation title:
"Trusted Research Environments for Handling Sensitive Data in Research: A Swiss Experience and Perspective"

Biography (max 700 characters, space included):
Dr. Sergio Maffioletti is a group leader at the Scientific IT Services at ETH Zurich. He is responsible for the implementation and the operation of the LeoMed Trusted Research Environment which is the Zurich node of the BioMedIT infrastructure. After his PhD in computer science at the University of Fribourg, Sergio worked at the Swiss National Supercomputing Center where he developed competences in High Performance and Grid computing. He joined the University of Zurich as project director of the Grid Computing Competence Center and then joined the S3IT support group where he managed several initiatives for establishing national academic e-infrastructure. In August 2019 he joined the Scientific IT Services (SIS) at the ETH Zurich as group leader of the Research IT Platform group."
